WATER RESOURCES MANAGEMENT

Gain a core understanding of the natural science shaping the water cycle, the social contexts and processes that drive changes in water availability and use, and the economic, legal and financial factors that shape water management decisions. WRM is one of seven available program areas within the MEM program.

2^{year} residential master of environmental management (mem) program

ECOTOXICOLOGY AND ENVIRONMENTAL HEALTH

Focus on understanding how pollutants affect the health of people and ecosystems. You will assess the fate, effects and risks of pollutants using a multidisciplinary approach that incorporates toxicology, environmental chemistry, risk assessment and ecology. EEH is one of seven available program areas within the MEM program.

DUKE ENVIRONMENTAL LEADERSHIP MASTER OF ENVIRONMENTAL MANAGEMENT

The DEL-MEM degree offers working professionals the opportunity to continue their education, advance their careers and become leaders in their organizations.

If you are a working professional with at least five years of environmentally related experience, consider the two-year Duke Environmental Leadership online MEM degree. This program's flexible structure allows students to develop a highly transferrable leadership-driven skill set that is both convenient and efficient.

MASTER OF FORESTRY

The MF trains foresters to work effectively on the emerging frontiers of forest management, and conservation and policy, with practical field skills augmented by cutting-edge tools in geospatial analysis, multi-resource assessment, and finance.

With seven on-campus MEM concentrations to choose from, plus opportunities to earn a professional MEM or SAF-accredited MF degree concurrently with a master's degree in business, law, public policy, engineering, or education, you will have the ideal exploratory platform for pursuing an impactful and rewarding career. Our students graduate as leaders—capable of affecting change, spurring innovation, and inspiring others to action. Master of Forestry students have access to the 7,000-acre Duke Forest adjacent to campus.
